## Configuring Transaction ACT1 for Input

70

720

Program variables currently selected for input

Configure	Data Element	Actions	Type	Byte Length
<b>Deselect</b>	01 DFHCOMMAREA	<u>view in source</u>	GRP	16

740-

740-

Candidate program variables for input

80

790

1. Most likely candidate: DFHCOMMAREA -

(You have already selected DFHCOMMAREA.)

795

## 2. Likely candidate referenced redefines DFHCOMMAREA -

( There are no top level data elements which both redefine DFHCOMMAREA and are also reference the initial program.)

### 3. Candidates: referenced top level data elements

Configure	Data Element	Actions	Type	Byte Length
<input type="button" value="Select"/>	01 HV-ACTNO	<u>view in source</u>	NUMB	4
<input type="button" value="Select"/>	01 HV-BALANCE	<u>view in source</u>	NUMB	5
